Ray Console

As simple as you need

Q-Ray Console

The revolutionary new Q-Ray Console has hardware that is designed to last. The software has been built from scratch using the newest software development approaches and technologies. The entire design is done in Switzerland, the engineering in Poland, and the production is European.

Engineered to Last

- Shielded by a 1.5mm steel housing
- Armed with 38 high quality faders
- Buttons rated at 50 million cycles
- Guided by over 400 individual LEDs
- Connected with built-in Wifi
- Proven XLR and RJ45 connectors
- Exclusive use of metal screws

Built to Adapt

- Support information is always up-to-date
- Automatic notifications about updates
- Extend software with the module store
- Extend to 4 universes of DMX
- Extend pages of devices and memories
- Add control of position, gobos, and more
- Flexible subscription or purchase options

Designed for Security

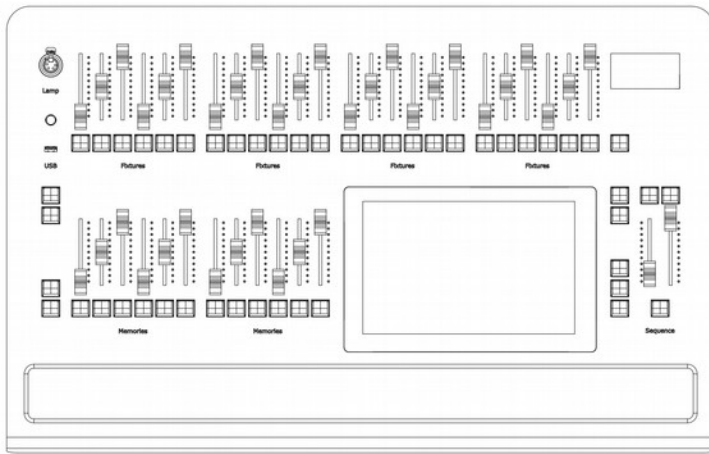

- Fine control of access to settings
- Password secured settings area
- Protect saved shows from being deleted
- Restore settings to a known state
- Quick and easy console lock
- Intelligent autosave
- Only updates software when you tell it

Created for Today

- Software written completely from scratch
- Modern touch interface design
- Swipe, zoom, and tap like on a phone
- Quick responsive touch technology
- Access rayconsole.com directly from the console to browse the latest features

Choose your Console

The Q-Ray series comes in two sizes to best fit your needs. All consoles come with a 10" capacitive touch screen and the modular Ray Console software. Both consoles are built out of quality steel and are finished with a luxurious hand rest for comfort.

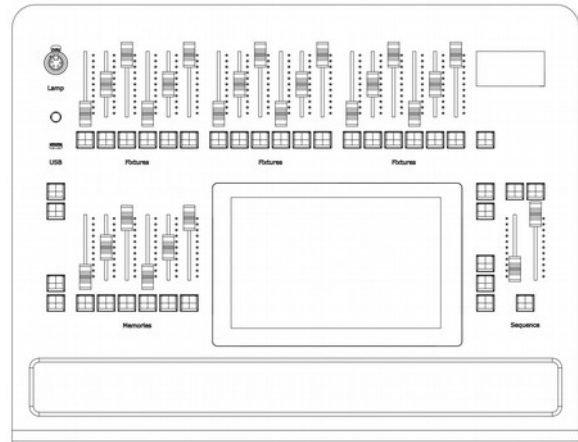

Q-Ray Console 36

- 38 faders
 - 24 device faders
 - 12 memory faders
 - cross faders
- 10.1" capacitive touch screen
- XLR for desk lamp
- 3 x USB 2.0 connectors
- 2 x DMX out
- Up to 4 Universes
- Modular software

Q-Ray Console 24

- 26 faders
 - 18 device faders
 - 6 memory faders
 - cross faders
- 10.1" capacitive touch screen
- XLR for desk lamp
- 3 x USB 2.0 connectors
- 2 x DMX out
- Up to 4 Universes
- Modular software

Choose your Modules

You can easily subscribe to or purchase software modules to extend the functions of your console. By adding the modules that you require, you can tailor the console to your needs, while not paying for features you don't need. Below are listed a couple popular modules. More at rayconsole.com

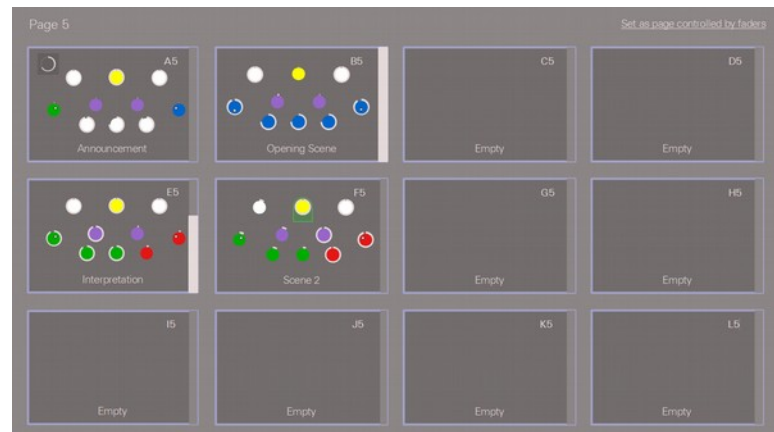

Colour Control

Take control of your colour with the colour control module:

- RGB / CMYK Colour Picker
- Recently picked colours
- Colour wheel picker
- Colour scroller picker
- Smart selection management

10 Memory Pages

Create more space to explore your creativity by expanding from 4 to 10 pages of memories. This increases the number of memories that can be saved in one show e.g. on the Q-Ray Console 36 the number of memories will increase from 48 to 120.

Technical Data
