*Ray Console*

As simple as you need

# Q-Ray Console

The revolutionary new Q-Ray Console has hardware that is designed to last. The software has been built from scratch using the newest software development approaches and technologies. The entire design was done in Switzerland, the engineering in Poland and the production is in Europe.

## Engineered to Last

- Shielded by a 1.5mm steel housing
- Armed with 38 / 26 high quality faders
- Buttons rated at 50 million cycles
- Guided by over 400 individual LEDs
- Stay connected with built-in WiFi
- Proven XLR and RJ45 connectors
- Exclusive use of metal screws

## Designed for Security

- Management of access to settings
- Password secured settings area
- Quick and easy console lock
- Restrict who loads and edits shows
- Back up shows to USB
- Review before applying changes to patch
- Only updates software when you tell it

## Built to Adapt

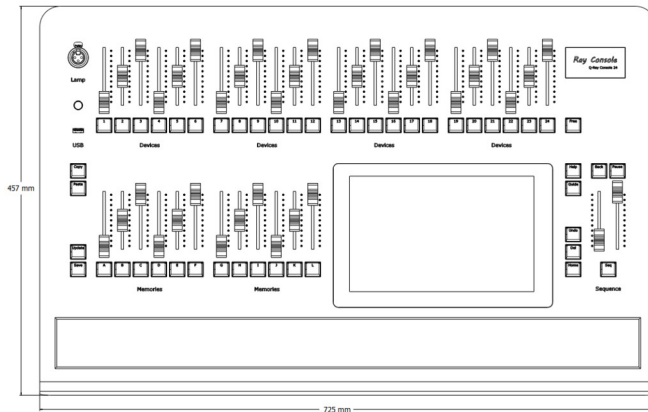

- Support information is always up-to-date
- Automatic notifications about updates
- Extend software with the module shop
- Extend to 8 universes of DMX
- Extend pages of devices and memories
- Add control of position, gobos and more
- Flexible subscription or purchase options

## Created for Today

- Software written completely from scratch
- Modern touch interface design
- Swipe, zoom and tap like on a phone
- Quick responsive touch technology
- Access rayconsole.com directly from the console to browse the latest features

# Choose your Console

The Q-Ray series comes in two sizes: the Q-Ray Console 36 and the Q-Ray Console 24. All consoles come with a 10" capacitive touch screen and the modular Ray Console software. Both consoles are built out of quality steel and are finished with a durable black hand rest for comfort.

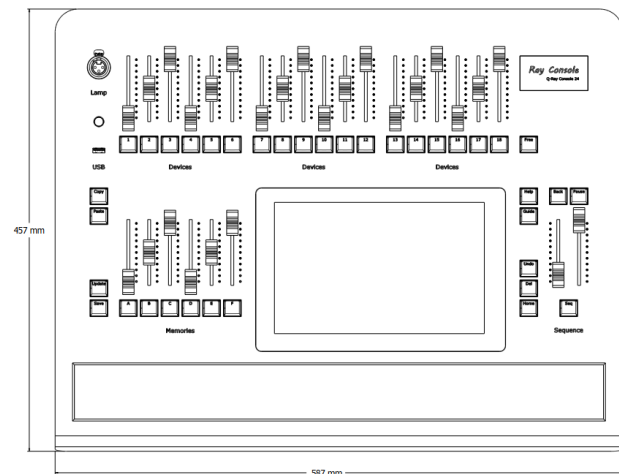

## Q-Ray Console 36

- 38 faders
  - 24 device faders
  - 12 memory faders
  - cross faders
- 10.1" capacitive touch screen
- 3-pin XLR for desk lamp
- 3 x USB 2.0 connectors
- 2 x 5-pin XLR for DMX
- Up to 4 Universes
- Modular software

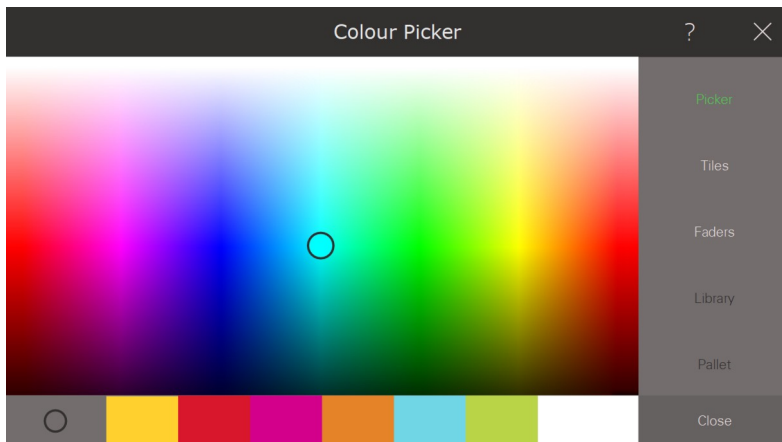

## Q-Ray Console 24

- 26 faders
  - 18 device faders
  - 6 memory faders
  - cross faders
- 10.1" capacitive touch screen
- 3-Pin XLR for desk lamp
- 3 x USB 2.0 connectors
- 2 x 5-Pin XLR for DMX
- Up to 4 Universes
- Modular software

# Choose your Modules

You can easily subscribe to or purchase software modules to extend the functions of your console. By adding the modules that you require, you can tailor the console to your needs, while not paying for features you don't need. Below are listed a couple popular modules. More at [rayconsole.com](http://rayconsole.com)

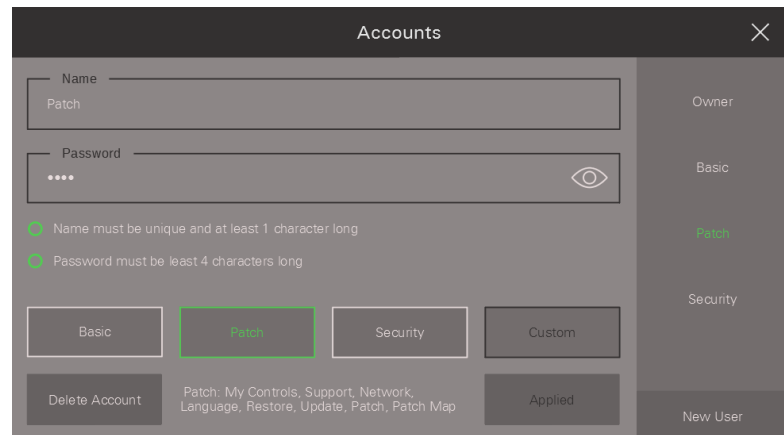

## Colour Control

Take control of your colour with the colour control module:

- RGB Colour Picker
- Recently selected colours
- Tiles Colour Picker
- Smart conversion of selected colours to device output
- Smart selection management

## 8 Settings Accounts

If you have a larger team of lighting technicians, you will need more settings accounts. Perhaps you also have external organisations that use the lighting system. Increase your control of who changes what on the system with two extra access profiles: Patch and Settings.

# Technical Data

## Hardware
